

## Two component measuring for relining

### Task

The customer manufactures equipment for relining pipes in industrial applications and household wastewater pipes.

### Problem

Measuring of two components, resin and hardener to get the right proportions.

### Solution

Our Swedish distributor, Sikama, proposed two IOG® 1/4" oval gear meters constructed from stainless steel and also the half inch version, each with the ILR740 display. Both solutions are providing excellent results. 14 pcs. of IOG® 1/4" and 4 pcs. of IOG® 1/2" have been supplied up to now.
